We are very fortunate to live in a city where there is plenty of food and necessities. However, the pandemic has brought unprecedented situations since 2020, and the fifth wave at the beginning of this year was jolting our society. The number of confirmed cases reached a peak. Schools, public transport, commercial and public institutions were nearly at a halt.

Many activities and plans of our Precious Link Center had to be postponed or suspended. Thankfully, we received many supports from various kind donors who showed their concerns to the underprivileged. The aid allowed us to make immediate adjustment and launch support services according to the urgent needs of the service targets.

other services

Over the past two years, our Center had served more than 19,000 people. We are encouraged by the continuous recognitions of our services from the beneficiaries and partners. The most exciting news is that we can bring the hidden thought of establishing an elderly day care center to light. We have received a donation and are now actively preparing the details. Hopefully it will start to provide services soon in next year.

The **Hope** You Are Bringing. The **Lives** You Are Changing.

Working together to help the vulnerable

The horror of the fifth wave of the pandemic spread to every corner of our society in the beginning of this year. The number of confirmed cases soared uncontrollably. The whole city snapped up medicines and supplies result in shortage, government hospitals were full and some patients needed to stay in tents, certain restaurants and banks were closed, and some public transport was suspended.

During this extraordinary period, the uneasiness magnified among the old and the disadvantaged. The shortage of resources threatened their immediate needs, making them in a helplessness situation. At that time, relying on our own could not satisfy the tremendous needs, but thanks to the timely financial support from various parties which allowed us to implement emergency assistance plans to solve the urgent needs.

We arranged online doctor consultation services, provided medicine support for the elderly patients, and shared some protective clothing to the elderly centers. When we were willing to open up our storeroom, trucks of supplies and food arrived at our center instead, letting us to distribute them to the sick, the elderly, the low income families and the elderly centers in the Sham Shui Po area. We simultaneously arranged fresh vegetables

for the less fortunate to maintain a balanced nutrition. Despite limited manpower and rampant germs, our colleagues and enthusiastic volunteers rushed to the homes of the elderly, just to show our care and concern with bags of supplies.

During this period, the chaos in the community also caused various family needs, emotional distress and financial difficulties. Our staff made regular phone calls to the elders to appease their daily situations, provide correct information and assistance, relieve their anxiety, help them to live a normal life and maintain good health condition under the pandemic.

A few minutes of contact

Agnes' job used to provide rehabilitation and cognitive impairment training for the elderly. Unfortunately, many services were suspended earlier on this year and Agnes' job was also affected, along with it she lost her regular income.

HOPE worldwide received a subsidy at that time to specifically support the unemployed women through offering short-term jobs to them. Not only attracted by the job opportunity, Agnes saw the increasing needs in the society at that time. So, she participated in the meal delivery service. Her working experience was well applied in this service. Other than delivering meals for the elders who had mobility problem, she also visited those suffering from chronic illnesses with bags of food and anti-pandemic supplies.

Agnes was unable to meet the service targets in the beginning as they were anxious and reluctant to meet other people. What impressed Agnes most was the human touch among the neighborhood. The elders shared the food and supplies with their neighbors when the pandemic was getting stable. When the relationship was established, many elders would even wait at their doors a bit earlier in order to chat with Agnes, and sometimes with a small surprise.

Elderly Service

Healthily ageing at home

The effort for caring an elder, both physically, emotionally and mentally, is demanding especially when an elder's mobility declines as a result of ageing.

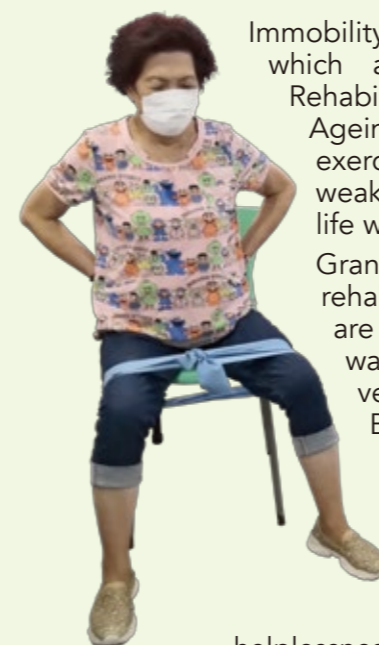

HOPE worldwide is committed to promote the concept of 'Healthily Ageing at Home', helping the elders to regain their self-care ability so that they could happily live at home despite of ageing. Immobility and dietary restrictions due to dental problems are very common among the elders. The Elderly Mobility Booster Program has been underway for nearly two years and it has successfully helped many elders to walk again without any assistance. Some of them could even go outdoor, regaining the basic needs of their life and thus reducing the pressure on the caregivers.

The Elderly Mobility Booster Program starts with walking. It trains the elders to walk on their own, so that this could relieve their pressure of going to toilet, thus enabling them to eat and drink freely. Proper exercise, suitable eating habits and worrisome of toileting at night could improve sleeping quality. This cycle of self-care ability supports the elders to have a healthy and quality life. At present, we have evaluated more than 300 seniors, and 140 of them are currently undergoing exercise training.

Rehabilitation Class helps the elders regain hope

Immobility caused by pain is a typical problem among the elders which affects their physical ability and mental emotions. Rehabilitation exercise is one of the programs under the 'Healthily Ageing at Home' to improve the physical condition through exercise therapy. These exercises are designed to address the weakness of the joints so that the elders could enjoy a normal life when their pain is relieved.

Granny Tang and Granny Wong have been participating in the rehabilitation exercise class for several months and the effects are very satisfactory. They no longer need crutches and can walk properly now. The 78-year-old Granny Tang used to be a very active volunteer, often participated in various activities. But she could barely walk and her left hand could not lift up due to joint degeneration and frozen shoulder respectively.

She often endured pain to save money for visiting a doctor until it was an urgent need. Under such situations, she relied on meal delivery by the volunteers as she lived alone.

All of these increased her helplessness, worrying that her health condition would continue to decline.

Granny Wong was suffering from a fractured hip after accidentally slipped down three years ago and she underwent a complex operation. She was given physiotherapy for weeks but it was not easy as she suffered a lot from pain. Both Chinese and Western doctors diagnosed that it was a cureless case due to physical degeneration. But every time when the weather changed, the pain was more severe. She was unable to prepare meals and relied on bread only. It seemed that there was no way to improve her health condition. And she lived alone, life was too challenging to her.

But there is a big change after several months of resistance and balance training in the rehabilitation class. They can now flexibly move every part of their body and easily follow every step demonstrated by the coach. They no longer need a crutch to walk. Granny Tang tells with a smile that the rehabilitation class has become the first thing to do every week no matter how busy she is.

Instructor Keith points out that each elder has different abilities, daily habits and pain symptoms. He would set a direction when designing rehabilitation exercises according to the level of joint degeneration so as to help the elders to cure their problems step by step. Keith feels the unexpected significance of the rehabilitation exercises for the elderly, especially when seeing them gradually restore their motivation to life with smile on their faces and no longer suffer from pain.

Bringing warmth on the Elderly Day

The HOPE worldwide Elderly Day held in January was affected by the outbreak of the pandemic. However, our desire to show our care and encouragement to the elderly, without violating the social distancing restriction, sustained us to distribute 1,000 goodie bags to those living alone or with spouse in the Sham Shui Po, Shek Kip Mei, Wong Tai Sin, Yau Tong and Tuen Mun areas through the community elderly centres.

Keep the muscle of the elderly

HOPE worldwide is honored to be selected to join the JC InnoPower Fellowship for Teachers and Social Workers organized by The Hong Kong Jockey Club Charities Trust. This talent development program selects only eleven proposals and invites experienced executives from the social welfare and business sectors to conduct an 8-week cross-sectoral leadership collaboration for the selected social workers and teachers, who will also participate in a 2-week overseas exchange in Oxford, England and other countries.

In addition to enrich our exposure, broaden our global perspectives, and power up our creativity, The Hong Kong Jockey Club also provides a subsidy to implement the 'JC InnoPower@ Healthy Ageing in Park' program submitted by HOPE worldwide. This program identifies the high-risk sarcopenic elders in the community so as to reduce their risk of falling.

According to a survey conducted by the Chinese University, one out of ten elders has sarcopenia. In cooperation with Sham Shui Po health centres, 'JC InnoPower@ Healthy Ageing in Park' program has screened 120 elders in the community. More than 40 of them are identified as suspected sarcopenia, whom are then assessed by our physiotherapist. Analysis and physical test are adopted to find out which part of their body has inadequate muscle mass and strength.

This group of sarcopenic elders is now followed up by 4 students from the Department of Physical Education of the University of Education. Exercise classes are regularly arranged in a public facilitated park near their residence, for pinpointing and strengthening their physical weaknesses in order to restore the functions and reduce the risk of falls. These elders are encouraged to go to the park to practise regularly on their own.

A Santa Claus orientation activity will be held at the end of this year so that the participated seniors would see the results of their efforts, encouraging them to continue to exercise.

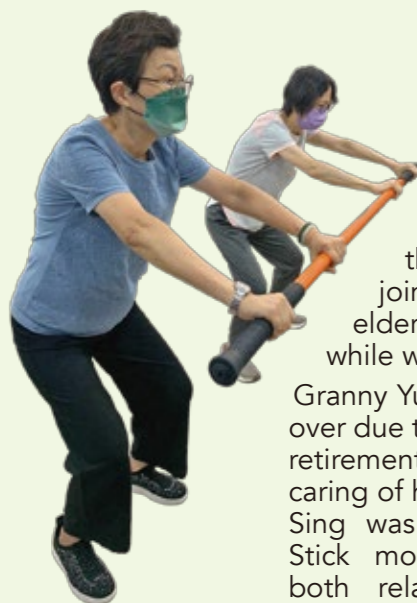

Using a stick to show the elders' vitality

"Muk Ying, slower, slower," instructor Alvin patiently taught the elders to use long sticks to stretch their bodies during the stick mobility training class.

Granny Muk Ying, Uncle Sing and Granny Yuk Fen have been participating in the stick mobility class for half a year. Alvin points out that the long stick can multiply the effect of stretching the body and relax the joints of the wrist, arm, hip, knee and the other areas. In many cases, the elderly has knee-aches because their ankles are stiff and they are prone to falling while walking.

Granny Yuk Fen used to ache all over due to work pressure before retirement and the stress of caring of her mother, while Uncle Sing was suffered from strain. Stick mobility exercises could both relax the muscles and reduce loss. The seniors like to go to the training class together. Not only can they interact with the trainer, correct instruction of posture is given which is more effective in identifying their physical weakness.

The third dental clinic is in service

HOPE worldwide sets up two dental clinics in Sham Shui Po and Kwai Fong since 2017 which are operated as social enterprise. Our mission is to provide high-quality dental services to local community at reasonable charges, thereby helping the elderly and low income families who are in need. The demand of dental services in this sector has never stopped increasing. In just a few years, we have served more than 11,000 patients.

Thanks to the sponsorship from the Suen Chow Yuet Kam Charitable Fund, the third dental clinic has joined the service since October. The new clinic is specially located in Prince Edward which is close to the MTR station. A convenient location for those with limited mobility to reach by public transport. The clinic is equipped with advanced equipment for more accurate diagnosis and treatment.

Dental Health x Nutritious Foods

The 80+20 Community Elderly Oral Health Program, funded by the Vera Ruttonjee Desai Foundation, has been sending out dentists to different elderly centers for dental examination and oral health education. Those with dental needs are then referred to our clinics for free scaling service. This project, so far, has cooperated with 13 elderly centers to conduct 26 dental examination sessions, benefiting more than 1,250 elders.

The aim of the 80+20 Community Elderly Oral Health Program is to help the elders improve their awareness of oral care and retain at least 20 teeth at the age of 80. Many elders in the low income sector neglect teeth protection due to cost issue. When encountering oral problems, less than 50% of the elderly would seek professional dental care. Seldom do they take care of their teeth if they do not have toothache problems. Thus, we also focus on education and publicity to help them increase their oral care knowledge.

The recipients of elderly living allowance are entitled to receive free dental treatment through the Elderly Dental Services Subsidy Program sponsored by the Community Care Fund. We are also one of the designated dental clinics approved by the Social Welfare Department to provide dental services for the CSSA beneficiaries who are eligible for dental allowance.

Low-income families and their children 'Smile Again'

Working together with the Society for Community Organisation and sponsored by the HSBC Hong Kong Community Partnership Program, the Smile Again Program will continue to provide free dental check-ups and scaling services to the low-income families and their children aged 0-6, as well as those in need. Under the Smile Again Program, dental care services have been provided to 439 low-income family children with emotional, mental or behavioral disorders, physical disabilities, and special educational needs (SEN).

HOPE worldwide Center for Kids

The HOPE worldwide Center for Kids has served 29,763 children from the low-income families, providing after-school learning assistance and character-building guidance, and hoping to break the cycle of poverty for these families.

No. of beneficiaries:

Support youths from subdivided housing families to gain opportunities

HOPE worldwide is invited by the Hong Kong Council of Social Service (HKCSS) to become one of the service partners of the Family Support Service Scheme for Subdivided Units. Sponsored by the Hongkong Land, this two-year project provides diversified activities and supports for the young people living in the subdivided flats through five themed activities, thereby expanding their life experience and insights, and striving for better opportunities.

HOPE worldwide has designed a series of activities, including 'Interesting Chinese, English and Maths Improvement Course', 'Diversified Social Improvement Course', 'Healthy Family Workshop' and 'Oral and Joint Muscle Health Workshop'. The first phase mainly targets the primary and secondary school students living in Sham Shui Po. Through interesting teaching activities and games, this would help the youths to enhance their academic knowledge and interest in learning, and develop better characters. Parent-child activities and parent support services are simultaneously arranged.

Our Program takes into account the oral and dental health needs of the school children. Dental check-ups are arranged at the HOPE worldwide Dental Clinic, whilst our physiotherapist provides muscle training to help them to grow up healthily.

'A Village Makes SENse' Program for the SEN children

HOPE worldwide's 'A Village Makes SENse' Program is a one-stop learning center for caring the children who have special educational needs (SEN). Other than helping the students to complete their homework, we also focus on building their characters and social skills.

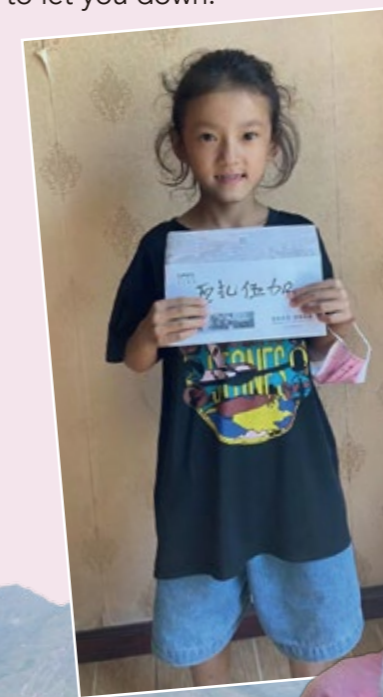

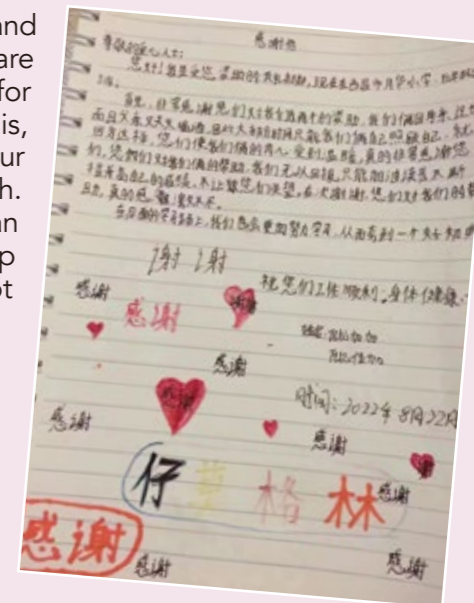

The poverty children in the Mainland

HOPE worldwide Children's Home has carried out education assistance activities since 2008, providing learning opportunities for more than 300 local children living in poor mountainous areas in 17 counties of Liangshan Yi Autonomous Prefecture. Most of these assisted children are orphans or from single-parent families. Currently, their needs still outweigh the works of improving the environment and education which have been carried out for many years. The educational resources there are always lagging behind. Some young kids have to quit school and work in order to support their families though they have good grades at school; some are suffering from illness; some are still walking for a few hours to school.

Special thanks to all parties for helping the impoverished children in the Mainland over these years and giving them a chance to continue their studies.

Letter of thanks from two sponsored school children, Wazagaga and Wazawuga:

"Our mother has passed away and our father drinks every day, we are left to take care of ourselves for most of the time. Because of this, our hearts are enveloped in your help and care. Thank you so much. We have nothing in return, we can only study hard and will keep improving our grades in order not to let you down."

News of HOPE worldwide Inter- national

Endless Needs in Ukraine

Since the beginning of the Russo-Ukrainian War, HOPE worldwide (international) has been actively responding to the situation, preparing humanitarian relief, providing recovery assistance, and delivering peace-building efforts for those affected in Ukraine.

Our HOPE worldwide Global Disaster Response Team has been working in Eastern Europe to bring medical supplies, non-medical supplies and emergency housing to all Ukrainian refugees and those in need. So far, hot meals have been served, clean water filters have been delivered and over thousands of refugee families have been placed into homes, including 31 cities across Europe. Our team is coordinating with our staff and volunteers in Eastern and Western Europe to provide these refugee families with financial, emotional, and physical supports.

Join Forces to Help the Hurting

Throughout this humanitarian crisis, Heart to Heart International (HHI) and HOPE worldwide worked together around the clock to provide immediate support and essential aid to people and families in Ukraine, which included one of the largest medical humanitarian cargoes since the Russian invasion and also the single largest humanitarian shipment in HOPE worldwide's 30-year history.

The \$20 million cargo containing over 30,000 pounds of critical medicine and supplies arrived Warsaw, Poland, in April so that the HOPE worldwide's team could transport them into Ukraine to help the Ukrainian Ministry of Health restock around 100 hospitals and clinics for the injured and sick. This shipment included medicines for everyday health concerns (infections, high blood pressure, depression, etc).

Around the same period, HOPE worldwide Canada received a US\$50,000 grant from TELUS Friendly Future Foundation to support the mental health program in Ukraine.

In June, Teleperformance, Feed the Children, and HOPE worldwide joined forces to distribute food baskets or food vouchers to several key Ukrainian cities and refugee areas.

Thank you to all who have been generously supporting our Ukraine relief efforts. HOPE worldwide will continue to direct our resources to supporting thousands of displaced Ukrainians by supplying desperately needed food, medical supplies, psychosocial support, transportation and shelter.

For the latest update, please visit:
<https://bit.ly/3Ctzt82>

Our volunteers have been working rigorously every day to cook, prepare and pack the food, as well as delivering bags of food to the elderly stuck in the bomb shelters.

Financial Highlights

HOPE worldwide always adheres to the conviction of 'good steward' in the Bible and spends most of the donations on the beneficiaries. It is our aim to maintain the administrative expenses within 10% of the total expenditure. In 2021, 82% of the total expenditure was allocated to support different service programs and activities.
